Summary

Frontend Engineer specializing in building fast, responsive, and production-ready web applications. I focus on **React**, **Next.js**, and **modern JavaScript** to develop scalable, maintainable applications with clean architecture and strong user experience.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Libraries & Tools: React Router, Context API, Chart.js, Firebase, Git, GitHub, Vite, Netlify, REST APIs

Core Concepts: Responsive Design, API Integration, State Management, Component-Based Architecture, Authentication, Real-time Features

Projects

Next.js Expense Tracker

The project demonstrates client-side state management, data persistence, and interactive data visualization

• Live Demo: [Expense Tracker Demo](#) • GitHub: [Expense Tracker Repository](#)

Real-time Chat App

Built a real-time messaging application with Firebase authentication, live Firestore messaging, and protected routing.

• Live Demo: [Chat App Demo](#) • GitHub: [Chat App Repository](#)

React Dashboard App

Responsive analytics dashboard with charts and dark/light mode support.

• Live Demo: [Dashboard Demo](#) • GitHub: [Dashboard Repository](#)
